Sarah,

Paul M. and I pulled together a briefing for the RFA meeting next week. Ex. 5 Deliberative Process (DP) would have one briefing where he would go over program basics and I would do the lifecycle piece. Started with the presentation Paul A. gave at NBB this week and the latest Hill briefing. We included the results for all the fuels but not sure how much we need to emphasize other fuels.

Not sure when we will be back in the office, or how long I will have power, so wanted to get you a version to look at.

In the mean time I think I will, oh I don't know, maybe shovel some more #\$\$%^&* snow.
